

# BE PART OF BE BETTER

Competition is important because it keeps the focus on new ideas and increases the pace of innovation. We are always open to engaging partnerships and in-depth communication – but we are cautious when our products are combined across brands. The Clean System Seal provides orientation and helps to avoid risks.

There is one thing we clearly sense in our talks with manufacturers, dealers and fleet managers: The Clean System concept has struck a chord in the industry. One year after the initiative was launched over 200 Clean System partners are already committed to homogeneous system landscapes. **We look forward to the next 100 partners!**

THE SCHAUER FAMILY

# THE ORIGINAL DESERVES THE ORIGINAL

The variety of systems has grown along with the rising success of the quick coupler. Experience shows that mixed operation of this type creates unforeseeable complications, even at safety-related interfaces. As a specialist dealer or rental fleet operator, you play an important role in providing purchasing and application advice and after-sales service.

Which is why we introduced the Clean System Seal in 2019. This serves as a means of orientation for commercial partners and users who would like to avoid downtimes, accident hazards and complications with guarantees. **Join forces with us and many like-minded OilQuick sales partners for homogeneous system landscapes!**

*»As a specialist dealer or rental fleet operator, you play an important role in providing purchasing and application advice and after-sales service. So get yourself the Clean System Seal and become part of the Clean System community!«*

FRANZ JOSEF SCHAUER,  
MANAGING DIRECTOR

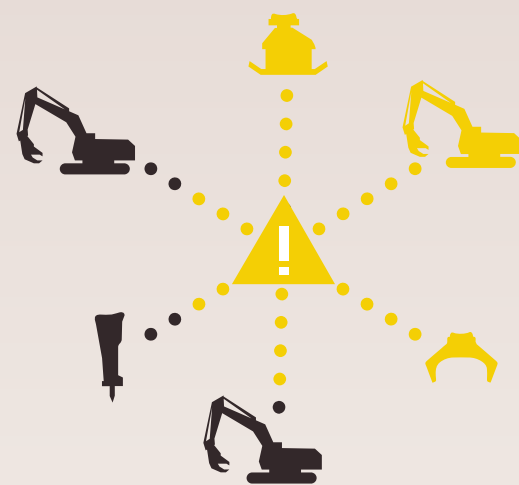

# WELL THOUGHT- OUTDOWN TO THE LAST DETAIL UNBEATABLE IN THE SYSTEM

The main reason for the impressive performance of our overall system:  
OilQuick quick couplers and tool adapters are not only robust and durable,  
but also perfectly matched to each other.

*"Clean System makes an important contribution to  
quality management – since we make no compromises  
when it comes to the operational safety of our  
products. Many talk about quality – but we deliver it,  
and protect you at the same time."*

CHRISTIAN RAMPP,  
HEAD OF DEVELOPMENT

Contamination during mixed operation

A clean, homogeneous system

## HOMOGENEOUS SYSTEM VERSUS MIXED OPERATION

Only with exact dimensional accuracy and precise coupling configuration do quick couplers and tool adapters form a seamless connection that works safely and trouble-free. All OilQuick system parts therefore meet the highest demands for production tolerances and material quality.

**In mixed operation, the coupling of non-system components becomes a critical point with an increased risk of wear, malfunctions and accidents. This is why the OilQuick manufacturer's warranty only applies to homogeneous systems with original OilQuick parts!**

### POTENTIAL RISKS:

- Damage to the hydraulic system
- Contamination of the oil circuit of other holder equipment and attachments through shared attached tools
- increased material fatigue and reduced service life
- electrical faults in safety-relevant circuits
- Misunderstandings of the locking situation

DID YOU  
KNOW?

## THE MYTH OF THE STANDARD INTERFACE

**The fact is:** There is no internationally standardised or normed interface for quick couplers - and consequently no universal compatibility amongst systems from different manufacturers nor guarantee agreements.

"We firmly believe that custom solutions such as the OilQuick system are the best strategy. Standards applying to all manufacturers are always the 'lowest common denominator' – which we see as a compromise to the detriment of our customers.

The high level of ongoing coordination required for a standard would slow the pace of innovation, as well as the diversification our market requires. And what's more: Identical geometry alone does not automatically guarantee the same level of quality. Quick couplers are not fast-moving consumer goods, but high-priced capital equipment in a hazardous working environment. We take this responsibility very seriously! That is why we continue to rely on our own OilQuick system so that we are able, at any time, to quickly and flexibly provide our customers with the best technical solution currently possible and uncomplicated guarantees."

FRANZ JOSEF SCHAUER, MANAGING DIRECTOR

# OUR SHARED GOAL: INSPIRE CUSTOMERS

Do you sell or hire out construction machinery and attachments and have managed to make a name for yourself with first-class advice and premium products? Are you now looking for ways to improve the quality management of the fleets you manage? This is where Clean System comes in!

**THIS IS WHERE OUR CLEAN SYSTEM PARTNER PROGRAMME COMES IN:**

The Clean System Seal indicates that you deal responsibly with the values of your customers, because homogeneous system landscapes minimise risks and maximise performance. And sustainably.

**OPERATIONAL  
RELIABILITY**

by avoiding disruptions and downtimes

**INVESTMENT  
SECURITY**

from a long service life and high value retention

**BEST POSSIBLE  
OCCUPATIONAL SAFETY**

by lowering the risk of accidents

**WARRANTY  
PROTECTION**

by the use of original parts

**MAXIMUM  
PERFORMANCE.  
MAXIMUM  
CUSTOMER SATISFACTION.**

## 4 BENEFITS FOR RETAIL PARTNERS

**1** Clean System protects your most valuable product: **TRUST.**

**2** The Clean System Seal is a valuable **MARKETING TOOL.**

**3** Clean System lowers your costs for **WARRANTY PROCESSING.**

**4** Clean System attests to your **PROMISE OF QUALITY.**

# WHAT EXACTLY DOES BECOMING A CLEAN SYSTEM PARTNER MEAN?

**First off:** Joining Clean System does not leave you with a choice between the various system providers. As a Clean System partner, you are still completely free to put together your brand portfolio as you wish.

Clean System is an interest group of OilQuick retail partners with a particularly high standard of safety, reliability and sustainability.

### AS A CLEAN SYSTEM PARTNER YOU ENSURE THAT:

- OilQuick products are not be indiscriminately combined with other quick coupler systems
- every constellation involving more than one brand is checked by us
- only original spare parts are used for servicing, and
- your customers are made aware of the risks of mixed operation.

# CLEAN SYSTEM A STRONG COMMUNITY

From A for ALLU Group to Z for Zeppelin Baumaschinen:  
Over 200 firms and rental fleets in the construction  
machinery sector already bear the Clean System Seal.  
Do you want to locate a Clean System dealer in your  
area? Or are you interested in a Clean System partnership?

**Please get in touch!**

*"The Clean System Seal is visible  
evidence of the high level of  
operational safety of our  
construction machinery, both in  
sales and in our rental fleet."*

SCHÜNKE BAUZENTRUM  
BAUMASCHINEN GMBH

*"Clean System is the answer to growing customer  
requirements for safety. The single source approach not only  
ensures the CE mark is protected, and thus also warranty  
and liability, but also the operational readiness and  
efficiency of the machines. With homogenous systems both  
we and our customers are on the safe side."*

ZEPPELIN  
BAUMASCHINEN GMBH

*"Customer focus is a central  
element of our corporate  
philosophy. The Clean System  
partnership highlights  
our above average quality and  
service standards."*

ALLU GROUP

*"Quality, safety and sustainability are important  
aspects of our guiding principles. It is for this reason  
that we specifically chose OilQuick to be our quick  
coupler product partner. The support of a homogenous  
system landscape contributes to this aim and Clean  
System participation was a consistent step for us."*
